- Hand-coded Adobe Photoshop and Adobe Illustrator designs to convert mock-ups and the layouts of the application.
- Used CSS Sprites to decrease the load time of web pages.
- Developed pages that are cross browser compatible across the browser like Internet Explorer versions 7 through 9, Mozilla Firefox, Safari (Win and OS X), etc.
- Involved with bug fixing on functionality, performance and designing issues with JavaScript and JQuery.
- Involved in parsing JSON API to JDOs and use them in frontend **handlebar.js**
- Used **JIRA** for **bug tracking** and **issue tracking**.
- Created Single Page Applications (SPA) using handlebars, backbone.js and node.js.
- Involved in designing and developing the JSON, XML Objects with **MySQL**.
- Extensively used **HTML5** for audio and video playback. Worked on the MVP architecture for the GWT.
- Used **jQuery** plugins **autocomplete**, **validation**, **drag and drop** and more exceptionally. Used **jQuery template** for markup. Used **Ajax**, **JSON** with **jQuery** for request data and response processing.
- Developed programs to port the XML data to database to make the website XML driven.
- Involved Finding out **the bugs, broken links and missing images** etc. and rectifying them.

Project 2: Cart Team

Responsibilities:

- Converted old legacy code to **React** based stack
- Integrated **Webpack 2** into our tech stack
- Managed state with help of **Redux**
- Implemented routing with **React Router 3/4**
- Developed our app with JSON based databases like **firebase**
- Implemented snapshot testing with help of **Jest**
- Used **JSX** to build **components**
- Developed **reusable components**
- Integrated **es6** into our application
- Used **Babel** to transpile our application to make it legacy browsers compatible with new **es6**
- Used **Prop Types** to ensure the type checking in our application
- Implemented CSS-in-JS components to ensure the modularity between different components we developed
- Implemented custom **Promises** in our application
- Developed modules to make our application as modular as possible
- Used **Webpack 2** to resolve multiple modules in our application
- Implemented **Tree-Shaking** to improve performance

- Integrated **Hot-Module-Replacement** with help of **Webpack 2**
- Environment:** JavaScript, JQuery, JSON, Ajax, HTML5, DHTML, CSS2, CSS3, Handlebar.js, Angular JS, React, Redux, React Router 4, Webpack , gulp, Node.js, Agile methodology, Bootstrap, Usability Testing, Jest and Jasmine, SSAS, GIT, MySQL.

Aadi Solutions, Hyderabad, India

Jun 2012 – May 2015

ROLE: Web Developer

Responsibilities

- Dynamic website design and programming using **HTML, CSS, JavaScript, jQuery.**
- Coordination of project activities and ensure that all project phases are followed and properly documented.
- Developed non-functional **HTML, CSS** pages from the mock ups and involved in **UI review** with **UI architect** and Business Units.
- Developed **jQuery** based calendar to schedule appointments.
- **Developed GUI using JavaScript, HTML, AJAX, CSS and JQuery** in ongoing projects.
- Model building by hand in **HTML, CSS, XHTML, XML, JavaScript, jQuery** and **AJAX.**
- Coded Java Script for page functionality using **jQuery.**
- Debugging the code using browser tools like **Firebug.**
- Developed user interfaces involving **HTML, JavaScript and CSS.**
- Created different Carousels using **jQuery Carousel**, and Accordions with the help of **jQuery UI** for different product categories.
- Ongoing new requirements gathering and updating on regular basis.
- Implemented pagination and sorting functionalities in different modules using **jQuery plugins.**
- Extensively involved in the discussions and design sessions user experience to provide input to designs
- Involved in complete SDLC – Requirement Analysis, Development, System and Integration Testing.
- Involved in implementing the **UI** to support all the major browsers like Internet Explorer, Mozilla Firefox and Google Chrome.
- Developed **HTML** pages using **HTML** and **JavaScript** for front-end validation.
- Learned all necessary front-end skills, a mastery of **CSS, HTML.**
- Expertise with **CSS Selectors, classes, ids, pseudo classes, Inheritance** and concepts
- Improved user experience through the design and creation of new web features and components.
- Handling platform compatibility issues (**IE, Firefox, and Safari**) on both Windows.
